REACT AUTHORIZATION APP USING FIREBASE (Freelance)

The perfect starter project application with authentication features to register, login and logout users. It displays information using React, navigate from URL to URL using React Router and store and retrieve data with Google Firebase.

KIDDY PLANET NURSERY – CONTENT MANAGEMENT SYSTEM (Freelance)

Designed and developed a content management system using wordpress for a Playgroup center, Kiddy Planet showcasing their features, galleries and registration module for new students.

MONDIAL BANK – COORPORATE WEBSITE TEMPLATE (Freelance)

Designed a corporate website template for a bank while carefully selecting the color palette and typography. The interface was planned according to the clients requirements with neutral colors. (HTML/ CSS/ Photoshop)

ADMIN CONSOLE – REACT – REAT ADMIN (Freelance)

Using React-Admin a framework which uses React, Material UI, React Router, Redux and React-final-form to create a unified admin framework.

UAE COMPETITIVENESS RACE – REACT APP

An interactive dashboard using React, which showed the weekly statistics for different race competitions held in United Arab Emirates. Data was fetched using API calls with NoSQL database MONGO DB.

AL FALAMANKI RESTAURANT – WEBSITE REVAMP (Freelance)

Revamped the current restaurant's website with a bright new theme and added more user-friendly interactions. After several brainstorming sessions and back and forth communication with the client, finished and delivered the project to a highly satisfied client.
